

University of Information Technology & Sciences (UITS)
Faculty of Engineering Science and Engineering
Department of Computer Science and Engineering
Program: B.Sc. in CSE
Mid Term Examination, Spring 2025
Course Title: Database Management System
Course Code: CSE 315

Marks: 20

Time: 1(one) hour

(Answer all questions)

Q.N	Here are the table structures:	Marks
	Books (BookID, Title, Author, ISBN, Price) Orders (OrderID, BookID, CustomerName, OrderDate)	
1.	a) Identify the following DBMS Key Types (Primary Key, Foreign Key, Candidate Key and Super Key) from the above tables.	[03]
	b) Suppose, customer A and B have initial account balance BDT 500 and BDT 300 respectively. Now, BDT 70 needs to be transferred from A's account to B's account. Explain how ACID properties will maintain the integrity of data in the above transaction.	[04]
	c) Why do we need Primary key and Foreign Key in DBMS	[03]
2.	a) A colleague at your workplace is confused between naive users and sophisticated users. Explain the difference between them in a simple manner.	[03]
	b) Define DDL, DML, DCL, and TCL, and provide an example of each.	[04]
	c) Explain the process of storing data in tables in an RDBMS and why it differs from using a traditional file-based system.	[03]
